CarePAK must be purchased during your product's warranty period. Turning on the Printer Press the POWER button. The POWER lamp flashes green while the printer warms up and changes to steady nonflashing when the printer is ready. If the ALARM lamp begins flashing orange, refer to Messages". About the Power Plug When removing the power plug after turning off the printer, be sure to check that the POWER lamp is not lit. If the power plug is removed from the wall outlet with the POWER lamp lit or blinking green, the printer cannot protect its print heads and may be unable to print. When paper is curled, gently bend it in the opposite direction of the curl without curling the reverse side and then load the paper. Loading paper in landscape orientation can cause the paper to be jammed. We recommend using Canon genuine photo media when printing photographs. 3 Ensure that the FRONT FEED button is not lit. Lift up the front of the printer to move it back and forth. For detailed information on the Canon genuine media for use with its various printers, refer to "Printing Media" in the Open the Front Tray. Side view of the printer 1 Tilt the Front Tray upward. Basic Printing 2 Lift the Front Tray. 3 Tilt the Front Tray forward to set it in the Front Paper Feeding Position. To Print Continuously To print from the Front Tray again, return to 3 in step 3 and load paper in the Front Tray. Be sure to follow the procedure below when returning the Front Tray to its normal printing position. Otherwise, the printer may be damaged. When the Front Tray is set to the Front Paper Feeding Position, printing by using the Auto Sheet Feeder is not possible. Create a document or open a file to print. The Print dialog box opens. Specify the required settings. 2 Ensure that your printer is selected. 3 Click Preferences or Properties.

You can cancel a print job while printing. "Canceling Printing" on page 25. Printing is canceled and paper is fed out. You can also cancel a print job by clicking Cancel Printing on the Canon IJ Status Monitor. To display the Canon IJ Status Monitor, click Canon Pro9000 on the taskbar. If you do so, electric shock, fire, or damage to the device could result. When printing photos with the digital device connected to the printer, it is advisable to use the AC adapter supplied with the device. The PictBridge compliant devices turn on automatically, when connected to the printer. For a device not turns on automatically,. Names of settings that are displayed on Canon PictBridge compliant device are used in the description given below. Different names may be displayed on your device depending on the brand or model. To do this, install the Canon Setup Utility from the included CDROM and connect the printer to a computer. For details, refer to "Canon Setup Utility Menu Windows" or "Canon Setup Utility Menu Macintosh". The printer properties dialog box opens. When opening the printer properties dialog box from Properties, the tabs related to the Windows function e.g., the Ports tab, or the Details tab are displayed. These tabs are not displayed, when the

printer properties dialog box is opened from Printing Preferences or application programs. When replacing them, check the model numbers and their installation positions.

With this printer, the following ink tanks are used. Green CLI8G Red CLI8R Photo Magenta CLI8PM. When using Mac OS X v.10.2.8, doubleclick the Print Center icon. Close and reopen the Top Cover to return the Print Head Holder to the center. If you open the Top Cover while the printer is preparing to feed paper from the Front Tray when the FRONT FEED button is flashing quickly, the Print Head Holder may not move to the center. Doing so can cause the printer to malfunction or become unable to print. Do not squeeze the side of ink tanks as this may cause the ink to leak out and stain your clothes and hands. The printer cannot be used unless all the ink tanks are installed. Once an ink tank has been used, do not remove it from the printer and leave it out in the open. This will cause the ink tank to dry out and the printer may not operate properly if it is reinstalled. Make sure that all packaging material is peeled off the ink tank. See "Replacing Ink Tanks" Increase the Print Quality setting in the printer driver settings. "Print Results Not Satisfactory or Contains Errors" Step 1 "Printing the Nozzle Check Pattern". If other than Lettersized paper is loaded, you cannot print the nozzle check pattern. When using Mac OS X v.10.2.8, select the name of your printer from the Name list and click Configure. Examine the nozzle check pattern output by the printer, and clean the Print Head when necessary. The nozzle check pattern will not be printed correctly if there is not enough ink. If you want to continue to clean the Print Head from here, go to 3 in step 3 of the Windows or Macintosh Print Head Cleaning procedures as appropriate. "Print Head Cleaning". Cleaning the Print Head Without a Computer The Print Head can also be cleaned from the printer itself. Print Head Cleaning starts when the POWER lamp starts blinking green. Do not perform any other operations until the Print Head Cleaning finishes. This takes about 90 seconds.

5 Read the message and click Print Check Pattern to print the nozzle check pattern. The nozzle check pattern is printed. When using Mac OS X v.10.2.8, select the name of your printer from the Name list and click Configure. Do not perform any other operations until the Print Head Cleaning finishes. The nozzle check pattern is printed. Ensure that the Inner Cover is closed. Ensure that the printer is on. Open the printer properties dialog box. "Opening the Printer Properties Dialog Box Directly from the Start Menu" page 33. Start Print Head Deep Cleaning. Printing Maintenance 1 Click the Maintenance tab. See "Replacing an Ink Tank" If the print head nozzles are still not clean, turn off the printer. Be sure to perform another Print Head Deep Cleaning 24 hours after turning off the printer. See "Replacing an Ink Tank" If the print head nozzles are still not clean, turn off the printer. Be sure to perform another Print Head Deep Cleaning 24 hours after turning off the printer. Aligning the Print Head Without a Computer The Print Head can also be aligned from the printer itself. If the printer driver is not installed in the computer, align the print head in this way. It takes about four minutes to complete printing. Do not open the Top Cover while printing. Print head alignment is automatically adjusted by printing the patterns. The printer is now ready to use. Printing Maintenance 1 Click the Maintenance tab. When using Mac OS X v.10.2.8, select the name of your printer from the Name list and click Configure. It takes about four minutes to complete printing. If the patterns are not printed successfully, refer to "Eleven flashes" in "Handling Error Messages". Take the appropriate action described in the message. Use photo paper such as Canons Photo Paper Pro to print photos or pictures in deep color that have high color saturation. On the Main tab of the printer driver, ensure that the Media Type selected matches the paper loaded.

The printed surface may be scratched or a malfunction may occur if Media Type is set to anything other than Board Paper. Replace the ink tank and close the Top Cover. Replace the ink tank as soon as possible after printing finishes. It may solve the problem. Delete an undesired print job, if there is any. Use Canon IJ Status Monitor in Windows or click the printer's icon in the Dock in Macintosh for the deletion. When reloading the paper into the printer, refer to Feed Properly". The number of flashes orange indicates the type of error that has occurred. Count the flashes and take the

appropriate action to correct the error. Once the ink absorber becomes completely full, printing cannot be performed until the ink absorber is replaced. Please be advised that Canon shall not be liable for any printer malfunction or damage caused by refilled ink tanks. A USB port is selected if either USBnnn Canon Pro9000 or MPUSBPRNnn Canon Pro9000 where n is a number is indicated. Then select Front Tray from Paper Source on the Main tab in the printer driver. Load the paper in the Front Tray and try printing again. Then check the Page Size setting in the Page Setup tab Windows or the Page Setup dialog box Macintosh in the printer driver and load paper that is the same size as the setting and try printing again. When using Mac OS X v.10.3.x or Mac OS X v.10.2.8, select Edit Printer List from the Printer popup menu. 2. Ensure that Pro9000 is displayed and the check box is selected in the screen that is displayed. PictBridgecompatible digital camera or digital video camcorder can be connected to your printer for Direct Printing. If this message appears, you will need to call for servicing to replace the absorber and to check the printer for proper operation. This section describes errors that are indicated on Canonbrand PictBridge compatible cameras. The error messages and operations may vary depending on the camera you are using.

For errors on nonCanon PictBridgecompatible cameras, check the status of ALARM lamp and take the appropriate action to clear the error. Does anyone know where I can download either for free or for purchase the entire Canon Pro9000 service manual or where I can get a set of instructions specific for replacing waste pads on this printer. Im looking for disassembly instructions as well as information on how to replace the pads. Also, does anyone know of a source for purchasing new waste pads. Thanks for any help you can give me. Here is the link Good luck getting that. Steve W. I believe they have the same printhead, ink droplet size.

The Mark II may include profiles for newer Canon photo papers, also. Ive had the Pro 9000 for a couple of years now. This method will only work in the long run if Canon has implemented a sensor for the waste ink level. If Canons criterion is the number of prints; this cleaning process obviously wont have any effect. Larry Ive had the Pro 9000 for a couple of years now. Gday Larry I thought you had to strip the printer down to get at the pads but you seem to be able to reach at least the top of them easily. Above that and to the far right aligned with the print head path is the Purge Unit. When the printer is ON and the cover is opened, the print carriage will move to center. With a flashlight torch the Purge Unit sponge pads are then visible under the right side. Because of the ink mixing, the ink color is essentially black; and, with the black plastic inserts can be hard to see. My

understanding is that the Purge Unit absorbs ink dumped during the normal and specific cleaning processes that whirring sound one hears quite often. The Ink Absorber accumulates overflow from the Purge Unit and excess ink from the carriage motion. Someone may clarify here. Larry If you already had the pads too saturated and it threw the overfill error code, that will need to be reset. I don't know what the reset sequence is on the PRO9000 but one should be able to find it on the net. I own a PRO9000 MK II for one year now. The Ink Absorber accumulates overflow from the Purge Unit and excess ink from the carriage motion. Someone may clarify here. I'm unfamiliar with the internals of the 90002, but my impression is that extra ink from borderless printing also ends up in the waste pads. There are specific allowed sizes for borderless prints, and I believe there is provision for the borderless overspray to get to the waste pads, eventually. Is this more or less correct.

Or do I have a flawed understanding of what happens to the ink from borderless overspray

Both make 13x19inch prints. Canons FINE print head technology and large 6,144nozzle print head using ink droplets of twopicoliters are harnessed to an enhanced double encoder system for media control to make quality prints at that level of performance. And then do it! Using Canon paper and ChromaLife100 inks results in prints with 100year fade resistance when stored in an archival photo album. A front tray accommodates single sheets of fine art papers too thick for the rear tray. Ambient Light Correction is only available under one supported operating system but also shouldnt interest anyone intent on selling their prints where the lighting, after all, should be secondary to the image. And PictBridge printing may be convenient but it, too, is not the sort of unoptimized printing we expect users to do on this kind of printer. Nothing could be further from the truth. You can use the View menu to see the images as a slide show or walk through them in gallery mode. But Canon has provided an installation booklet instead. That has the advantage of focusing your attention on fewer steps at a time. You dont have to evaluate anything because the printer checks each line as it is printed, rolling the paper back into the printer just a bit. Just pop in the CD and select the Easy Install option.
